

N98si SLIDING DOOR with Roto Patio Z accessory

Roto Patio Z

Standard hardware with positive control for Tilt&Slide windows and doors

The positive control function makes opening Tilt&Slide elements extremely easy

If you attach great importance to convenient ease of operation of your balcony door, then the new Roto Patio Z Tilt&Slide hardware is ideal for you. "Z" stands for positive control, which means that automatic tilting is activated when the handle is turned. The integrated positive-control function moves the sash into the tilting and locking position so that the sash does not need to be pushed manually. With this, even very large and heavy sliding doors up to 200 kg can be operated effortlessly.

Operating steps for Roto Patio Z handles

3. Disengage sash and slide

(remains disengaged when pushed shut)

New Roto Patio Z heavy-duty bogie

The robust, quiet running heavy-duty bogies are used on sash weights of more than 160 kg. Advantages for the window manufacturer:

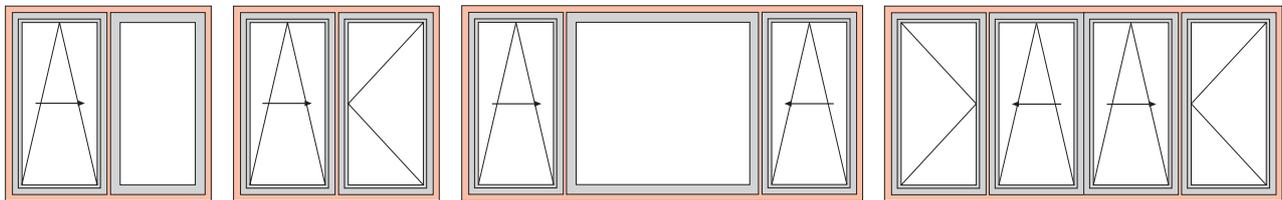

- One-piece housing for particularly high sash weights of up to 200 kg
- Preassembled modules enable rapid installation
